## Member's Profile

The Fabric and Apparel Accessory Manufacturers Association (FAAMA) was established in 2003 and is the governing body of Fabric & Apparel Accessory Manufacturers. FAAMA consists of member organizations of 'local' manufacturers of fabric and garment accessories such as buttons, elastic, hangers, interlining, lace, labels, molded bra cups and underwire, packaging materials, threads, zippers and fabric.

With over 30 member companies in its fellowship, FAAMA is the unified voice of Sri Lankan fabric and apparel accessory manufacturers and helps the industry to identify opportunities and work towards improving logistics, policies, and infrastructure, enabling standardised regulation that avoids policy uncertainty within the industry, facilitating high infrastructure and trade assistance through innovation, promoting local investment and attracting Foreign Direct Investment (FDI).

FAAMA encourages and supports the fabric and apparel accessory manufacturing industry to be responsible – economically, socially, and environmentally. FAAMA's overarching vision is an industry that can innovate, meet world-class standards and achieve global recognition.
